ORR - FF 3/1/92

DOE-ID has established primary points of contact for the INEL Oversight Program. All significant contacts with State employees such as meeting requests, meeting minutes, tours, and inspections must be reported to Peggy Hinman, MS-1150. DOE and the State have agreed that all requests for documents are to be submitted to the DOE-ID point of contact.

It is WINCO's policy to cooperate with the State to the extent practicable. State representatives have been granted access to ICPP by DOE except in the case where it could be injurious to the State representative or where there is a lack of security clearance and/or "need to know." State personnel may review documents while in the facility.

Within WINCO, the Office of Environmental Oversight has been established as the point of contact for the INEL Oversight Program information requests. Questions about a request by a State representative or contact reports should be reported to Kirk Jones, MS-3202, 6-5282.

K. L. Jones, Manager
Environmental Oversight
